

A typical rebated component set is used to convert a mortice lock with a flat forend, into a full rebated lock

1. The forend rim can be fitted either side of the lock depending upon hand.

2. Forend strip in position behind the forend. Left hand shown.

3. Lock and forend strip applied to a rebated door, the forend strip is secured by lock fixing screws.

4. The striking plate rim can be fitted either side of the striking plate (and secured by screws shown) depending upon hand.

5. The striking plate rim secured to the striking plate. Left hand shown.

6. The striking plate applied to a rebated door frame.
